**Zadanie 4. (0–4)**

Przeczytaj tekst, który został podzielony na trzy części (A–C) oraz pytania go dotyczące (4.1.–4.4.). Do każdego pytania dopasuj właściwą część tekstu. Wpisz rozwiązania do tabeli. Uwaga: jedna część tekstu pasuje do dwóch pytań.

In which paragraph does the author		
4.1.	point to an unsatisfactory quality of coffee in a certain type of establishment?	
4.2.	compare the demand for two different products?	
4.3.	mention the invariably high-quality coffee served in a country where it is not grown?	
4.4.	describe preparing coffee as a ritual?	

### COFFEE HERE AND COFFEE THERE

- A.** Few people begin the day without a hot drink. Chocolate and tea are popular morning jump-starters. But coffee dominates the morning hour in every time zone. While the plant that produces the beans is native to Africa, two main species of coffee are now grown in nearly every tropical region. The consumption of this beverage is increasing throughout the world, and though coffee is far from being the world's largest crop, it is now the second most needed commodity after oil. Coffee is present in almost every culture, yet it takes a wide range of forms throughout the world.
- B.** Ethiopia is the native homeland to the *Coffea* genus. People here have been making coffee in the same way for more than 1,000 years. Today, coffee is still served and serving it is a ceremony that changes the beans from raw red cherries into a toasty, steaming drink, often all before the guest's eyes. In contrast, in the USA there is "gas station coffee," the type that one gets in roadside diners. It is an ominously tea-colored product brewed hours before being served, so it resembles a coffee-like drink rather than genuine coffee.
- C.** But perhaps nobody has a better tradition of preparing coffee than Italy. Though many lines of latitude north of coffee-growing countries, Italy has somehow attained the position of coffee lord and master. It's here that a coffee lover can enter any establishment, whether an elegant bar or a small nameless café, and expect no less than the brown-black best. Never worry about getting a fake instant coffee, because "café" in Italy is synonymous with "espresso." Add milk, sugar, or ice cubes and the door to the creamy world of the most popular coffee variations opens wide.

**BITTY BAT**

In the depths of a dark cave in Sai Yok National Park, west-central Thailand, a tiny bat hangs effortlessly from the ceiling. A mere two grams in weight and a little over an inch in length, the bumblebee bat is one of the world's smallest mammals. It flies only under the cover of darkness in the dense forests, where it is but a shadow in the night. **5.1.** \_\_\_\_ But exactly which of them pose the greatest threat to the bats remains unknown.

In fact, there is much about bumblebee bats that has yet to be explained. They live in groups called colonies, but whether colonies move from one cave to another remains vague. **5.2.** \_\_\_\_ This process provides different types of information from which the precise location, orientation, and type of prey are identified.

The bumblebee bats' remote cave sites would suggest that the animals are safe from potentially threatening human activities. **5.3.** \_\_\_\_ According to the *International Union for Conservation of Nature*, colonies at some cave sites decreased by an estimated 14 percent between 1998 and 2008. In fact, there are now fewer than 10,000 bumblebee bats left in the wild, and populations in Thailand are expected to decrease by another 10 percent in the next decade.

Major threats to the existence of the bumblebee bat stem from human activities, and include, for example, human intrusion into caves from tourism, habitat destruction from mining and the burning of forests around cave entrances. **5.4.** \_\_\_\_ So, as part of their efforts to save the tiny creature, conservationists must now work to improve public education about the species so that people can respond positively to the need for its protection.

*adapted from www.britannica.com*

- A. How long bumblebee bats live is also unknown, but it may be around 5 to 10 years longer than in case of the lifespans of other closely related bats.
- B. Many of these acts suggest just a lack of awareness of the bats' presence or of the harmful impact being exerted on them.
- C. But since their discovery in the seventies by the Thai mammologist Kittu Thonglongya, the species has been in decline.
- D. Such secretive behaviour would suggest that bumblebee bats are trying to avoid being hunted by predators.
- E. What is known is that bumblebee bats, just like other bats, navigate and detect the target by emitting high-pitched sounds that bounce off objects and reflect back to their ears.

**Tekst 1.****MORNING RUSH**

A train pulls into the station. There is a loud hiss as the doors are released and a hard rolling sound as they spring apart. The train is almost empty but a large crowd of commuters is waiting to board it. At the door nearest the exit stairs a man in a grey tracksuit and holding a bicycle tries to get off the train against the crush of people trying to get on. One pedal of the bicycle snags a shopping basket which is pulled from the grasp of the middle-aged lady who is carrying it. The basket is dumped on the slatted wooden floor of the tube train. It contains mostly vegetables, including a plastic two-pound bag of new potatoes. This bag is ejected from the basket and splits as it hits the floor. The potatoes are all small and they scatter among the feet of those getting on the train.

One passenger, a businessman carrying a briefcase, steps on a potato. The man slides sharply to the right, recovers momentarily, and then pitches forward. He lets go of his briefcase and puts his hands out to stop his fall. One corner of the briefcase strikes the floor first, the clips at the top spring apart with the shock and the briefcase flies open. The contents are deposited across the floor of the rapidly filling carriage. A copy of the Financial Times, three pens, a red and yellow packet containing thirty-six photographs, and two tickets for the following evening's performance of 'Shirley Valentine' at the Empire Cinema with at least half a dozen paper clips. Three or four passengers bend down to help retrieve the contents of both the briefcase and the shopping basket while someone else helps the businessman who has fallen to get to his feet. He inspects his hands which are scuffed and bruised but not bleeding.

The cyclist, meanwhile, has managed to free himself from the crowd and is standing at the back of the platform waiting for the crowd to disperse. He has seen nothing of the incident with the shopping basket and the briefcase. He leans his bicycle against the wall and inspects it for signs of damage. The man in the train has now recovered his briefcase and all its contents except the paper clips. From his position in the centre of the space between the doors of the carriage he looks out over the heads of those latecomers still struggling to get on and sees the cyclist over by the wall as he leans over to check the chain and gearing.

- C. he intends to apologize for the incident he has caused.
- D. one part of the bike turns out to be broken.

**Tekst 2.****HIRE A BIKE TO WORK**

By 7.30 a.m., the suited hordes are already swarming out of Waterloo, Britain's busiest station. South West Trains commuters are marching half-awake towards tubes, buses and one of the 117 bikes in the station's "super-dock", the biggest in the capital. At this time there are plenty of bikes to take, and the suits unlock them with their membership keys, pedal off and flow over Waterloo Bridge. Wait half an hour, though, and there is a problem. A recent report showed that that by 8 a.m. there are only a few bikes left and 10 minutes later the super-dock is completely empty.

As commuters ride from the peripheries of the Cycle Hire Scheme zone into the City and central London, they leave empty docking stations behind them in the morning and fill up the ones where they park their bikes, so those arriving later either cannot find a bike to ride, or cannot dock it when they arrive at work. The problem happens in reverse in the evenings. Serco, the service company that runs the scheme, is supposed to redistribute bikes so that empty and full periods don't happen. Its fleet of vans and cars is supposed to ensure that if a docking station does not have a bike or docking point available, there will be another nearby which does, but the stories from users suggest that isn't the case. "The system must be reliable for people to be able to trust the transport for regular commutes. We're really fed up. It might be the time for the city council to reconsider whether it is the best service provider we can get," complained one user.

However, despite these inconveniences, the Cycle Hire Scheme is definitely a welcome improvement to the city's public transport network. Although many residents were skeptical about cycling in London rainy weather, the Cycle Hire Scheme has recorded nearly 19 million journeys. At this time of the year the 7,000 bikes in service are used about 10,000 times a day, a figure that doubles when spring arrives. The early doubters have also been proved wrong with regard to another issue. According to the latest data, compared to foreign schemes, London scheme has recorded much lower rates of theft. There are also fewer cycling accidents than feared earlier.

*adapted from London Evening Standard*

**6.4. Which of the following is stated in the text as an OPINION, not a fact?**

- A. Hiring bicycles is most difficult after 8 a.m.
- B. Commuters use the scheme most frequently in spring.
- C. The theft of bicycles for hire is lower in London than abroad.
- D. The service company is unable to carry out its task adequately.

**6.5. In the last paragraph, the author**

- A. questions the purpose of introducing the scheme.
- B. comments on the unexpected popularity and safety of the scheme.
- C. suggests making some improvements to the scheme.
- D. warns against negative consequences of using the scheme in the long run.

## GAP YEAR

When we **7.1.** \_\_\_\_\_ the last year of school, our future was something my friends and I frequently debated. There were those who wanted to go straight to university to avoid the rise **7.2.** \_\_\_\_\_ fees and those who chose to wait for their exam results before deciding what they wanted to do next.

I didn't really fit into **7.3.** \_\_\_\_\_ group; I decided to take a year off. To put it simply, I was tired of the structured form of school life. I thought I would get the most out of university if I went there having experienced more of the world, having changed the way I'd lived my life so far and, really, having grown up.

There was also the influence of my sister. Two years older than me, she had, at the last minute, made up her **7.4.** \_\_\_\_\_ to take a gap year. She has since said that although it was not a conscious decision, it was the best one she could have made.
